## Understand Your Performance: State, Regional and National Benchmarks for Ohio RHCs

Ohio Rural Health Clinic Presentation August 12, 2021

The Ohio Office of Rural Health see RHCs as a top priority

Your organization is being asked to participate in the RHC project to help develop a statewide performance improvement network

Rural Health Clinics are an essential part of the rural healthcare delivery system

2

## 2019 Ohio RHCs RHC Counts

## 35 66% Hospital-owned

# Total RHCs

## 8 34% Independent

## **RHC Modernization Act**

## **CAHs with Provider-based RHCs by State**

**Map A**: State Comparison of CAHs that Own Provider-based Rural Health Clinics (2019)

Data Source: December 2020 Medicare Cost Report release for hospital and RHC fiscal year 2019; and December 2020 CMS Provider of Services (POS) data file. Refer to the Data Management <u>slide</u> of this document for more details.

## 890

In 2019, there were approximately **1,350** Critical Access Hospitals in the US. Among those organizations, 890 owned and operated at least one Provider-based Rural Health Clinic. Collectively, these CAHs owned **1,649** PB-RHCs. The distribution of PB-RHCs largely reflected the distribution of CAHs across rural America, with a large percentage of PB-RHCs located in the Midwest.

### Slide 5 Version 1.0

## RHCs Established After 12/31/2019 by State

Copyright © 2021 Lilypad, LLC. All rights reserved. Do not copy or distribute without permission

## 295

The Act established a retroactive grandfathering provision to be effective December 31, 2019. In the time between the grandfathering date established in the Act and the enactment date of the legislation, **295** primary care practices had been newly designated as RHCs. Among that cohort, **142** were clinics subject to the capped rate and **153** were eligible for an uncapped rate. Overall, RHCs in **38** states were established after December 31, 2019.

### Slide 6 Version 1.0

## **RHCs with Cost Per Visit Rates >\$250**

**Table D**: Summary All RHC Cost Per Visit Rates with \$250 Threshold (FY 2019)

PAYMENT	>\$250	<\$250	ΤΟ
Capped Rate	115	1,235	1,3
Uncapped Rate	1,085	1,819	2,9
Total	1,200	3,054	4,2

In FY 2019, nearly three-quarters of all RHCs had a per-visit cost less than \$250.00 (3,054 of 4,254 RHCs or 72%)

> Note that **4,254** RHCs had complete, accurate and traceable cost report submissions

Copyright © 2021 Lilypad, LLC. All rights reserved. Do not copy or distribute without permission

Data Source: December 2020 Medicare Cost Report release for hospital and RHC fiscal year 2019; and December 2020 CMS Provider of Services (POS) data file. Refer to the Data Management slide of this document for more details.

### **DTAL**

- 350
- 904

### 254

1,200

Prior to the Act, PB-RHCs were eligible for an **uncapped** payment rate while RHCs that are owned and operated by hospitals with 50 beds or greater, as well as Independent RHCs, were subject to a **capped** per visit payment rate.

The relevant threshold of analysis for RHC Cost per Visit rates is **\$250.00** given the current distribution of rates across the 4,254 RHCs and the projected per-visit reimbursement levels established in the RHC Modernization section of the Act.

### Slide 7 Version 1.0

### **RHC Cost Per Visit Rate Bands**

**Chart A**: Distribution of Cost Per Visit Rate Bands for All RHCs (FY 2019)

Copyright © 2021 Lilypad, LLC. All rights reserved. Do not copy or distribute without permission

Data Source: December 2020 Medicare Cost Report release for hospital and RHC fiscal year 2019; and December 2020 CMS Provider of Services (POS) data file. Refer to the Data Management slide of this document for more details.

## 90%

**Chart A** displays cohorts based on cost per visit rates calculated as Total Costs divided by Total Visits. We constructed 13 bands based on the cost per visit rates for all RHCs for FY 2019. This analysis includes all RHCs (Independent and Hospital-owned) and excludes those clinics whose Medicare cost reports contained material errors, omissions or irregularities (n=293). For each band we calculated its percentage of total RHCs.

In FY 2019 for the 4,254 RHCs that had complete, reliable and traceable Medicare cost report submissions, **90%** of RHCs report a Cost per Visit rate lower than \$325

## Performance Measurement

## **Performance Ratios**

A critical few metrics, structured in the form of ratios across a targeted set of categories, provides a 360° view of RHC performance

Staffing Metrics	Clinic Value
Gross Charges per Total Staff	\$ 118,095
Net Revenue per Total Staff	\$ 87,619
Patient Visits per Total Staff	998
Clinical Staff Ratio	71.4%
Gross Charges per Clinical Staff	\$ 165,333
Gross Charges per Non-Clinical Staff	\$ 413,333

### **Performance Metrics**

Clinic Profit Margin	-6.52%
Clinic Profit Margin per Patient Visit	\$ -5.73
Clinic Profit Margin per Total FTE	\$-5,714
Expense per Patient Visit	\$ 93.6
Expense per Total FTE	\$ 93,333

### **Productivity Metrics**

Work RVUs per FTE Physician	3,278
Work RVUs per FTE APP	5,000
New Patients per FTE Physician	122
New Patients per FTE APP	325
Panel Size per FTE Physician	1,389
Panel Size per FTE APP	1,500

### **Compensation Metrics**

Salary per FTE Physician	\$ 139,063
Salary per FTE APP	\$ 115,000
Variable Compensation per FTE Physician	\$ 23,438
Variable Compensation per FTE APP	\$ 25,000

### **Quality Metrics**

NQF #0018 Controlling Blood Pressure	79.6%
NQF #0028 Tobacco Screening	85.9%
NQF #0038 Childhood Immunizations	35.3%
NQF #0059 HbA1c Poor Control (>9%)	93.6%
NQF #0419 Documentation of Medications	75.9%

Ratios that factor in **Total Staff** provide a way to normalize the data among clinics of different sizes

### Staffing Metrics

Gross Charges per Total Staff

Net Revenue per Total Staff

Patient Visits per Total Staff

**Clinical Staff Ratio** 

Gross Charges per Clinical Staff

Gross Charges per Non-Clinical Staff

Gross Charges describe the full, retail price of clinical services. Think of it as a car's Manufacturer's Suggested Retail Price (**MSRP**) in the sense that it is typically a higher price, and a starting point for actual cost

An RHC's most important asset is its people. Staffing Metrics allow clinic leaders to evaluate the number, profile and cost effectiveness associated with clinical and non-clinical team members.

**Profit Margin** functions as the most relevant and illustrative financial metric because it simultaneously accounts for revenue and expense:

(Revenue – Expense)

Revenue

### Performance Metrics

**Clinic Profit Margin** 

**Clinic Profit Margin per Patient** 

Clinic Profit Margin per Total F

**Expense per Patient Visit** 

Expense per Total FTE

Clinic leaders often focus on expense management in the form of reducing salary costs, FTEs and overhead. While these operational tactics can be useful, the underlying economics of healthcare delivery typically highlights the proportional value in focusing on revenue growth

Financial performance tends to drive many strategic and operational decisions. **Performance Metrics** allow clinic leaders to assess the overall financial performance, profitability and cost effectiveness of a clinic.

	-6.52%	
t Visit	\$ -5.73	•
TE	\$ -5,714	
	\$ 93.6	
	\$ 93,333	

Among the Profit Margin-oriented metrics, the **Clinic Profit Margin per Patient Visit** tends to be the most intuitive and insightful metric. Note — that changes in patient volumes will not result in a 1:1 change in profitability given the fixed vs. variable expense relationship in a clinic's cost structure

How effectively a clinic utilizes its resources can be a major driver of overall financial performance. Productivity Metrics allow clinic leaders to evaluate the amount of clinical output relative to staffing and overhead inputs.

**Relative Value Units** (RVUs) represent a unit of analysis that reflects the amount of work effort associated with a specific service/CPT code. Work RVUs are commonly used to set productivity goals and compensation levels for providers.

Work RVUs per FTE Physic Work RVUs per FTE APP New Patients per FTE Phy New Patients per FTE APF

Panel Size per FTE Physic

Panel Size per FTE APP

**Panel Size** has emerged as a key variable in the development of provider compensation packages given the increased penetration of value-based payment models, population health management priorities and Accountable Care Organizations (ACOs).

ician	3,278	
	5,000	
ysician	122	
P	325	•
cian	1,389	
	1,500	

**New Patient** ratios serve as a signal for the health and growth of the clinic's market and ability to attract patients who received primary care from other practices.

Total compensation generally can be divided into two major categories: **Salary** and Variable Compensation. The latter describes the "bonus" income or fringe benefits that the provider earns in addition to base salary.

### **Compensation Metrics**

Salary per FTE Physician

Salary per FTE APP

Variable Compensation per FTE Physician

Variable Compensation per FTE APP

Common examples of **Variable Compensation** can be categorized into Productivity, Value-Based and Other.

The linkage between performance and compensation is a management priority. Compensation Metrics allow clinic leaders to monitor the overall costs associated with provider salaries and variable compensation.

The National Quality Forum is responsible for coordinating the development and ratification of clinical quality measures. The following five NQF metrics have been identified via research by John Gale from the Maine Rural Health Research Center as the most rural relevant.

### Quality Metrics

NQF #0018 Controlling Blood NQF #0028 Tobacco Screenin NQF #0038 Childhood Immun NQF #0059 HbA1c Poor Cont NQF #0419 Documentation of

> The PQRS and then MIPS public reporting programs for physician practices included 100+ potential measures, most of which were relevant to large urban practices and multispecialty practices. Few of the metrics were rural relevant and/or valid for small volume clinics.

RHCs exist to provide access to high quality primary and specialty care to rural communities. **Quality Metrics** allow clinic leaders to determine the caliber of clinical care provided by the RHC's professional staff.

### **Ohio RHC Network Project**

In exchange for 20 minutes of your time one time per year, your RHC can access an external benchmark report in POND that will compare your performance to your RHC peers using all these metrics

Lilypad is a Maine-based analytics firm that provides mobile and web-based applications for rural primary care practices. We adhere to a core business principle that accountable physicians/clinical leaders and administrators require sound data and simple, innovative tools to be successful in their roles within the emerging value-based care delivery environment.
